Partnership announced on Aug 16th with a total of 20 days growth.

The market corrected itself after this with an average price increase of 6.16X at a price of \$0.000715 per token.

Initial price before MXS partnership

Base price of \$0.000116

MXS partnership

MXS partnership price \$0.00119

Natural growth with MXS

Natural growth price \$0.000715

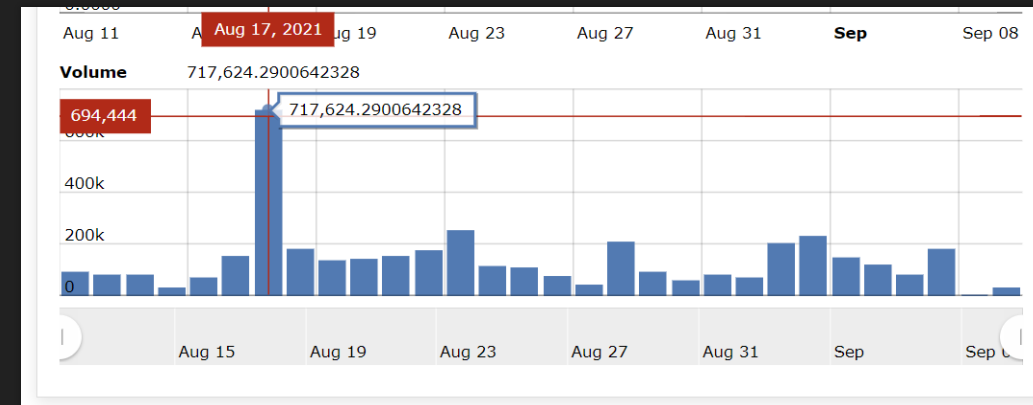

# Volume

Volume of 33,333 on Aug 14th, 2021, with a drastic increase to 717,624 on Aug 17th, 2021. Volume increase of 21.52X.

Volume of 175,922, 25 days after announcement and the entire crypto market down during the week of Sep 6th, 2021. This is an increase of 5.27X from before MXS partnership.

Volume before MXS partnership

Volume with MXS Partnership (2 days after announcement)

Volume with MXS Partnership ( 25 days after announcement)

# Market cap of Infinity Token

Using the statistics from the token price slide we can calculate the market cap.

Base price of \$0.000116,  
Aug 13th, 2021

$$5,000,000,000 \times \$0.000116 = \$580,000$$

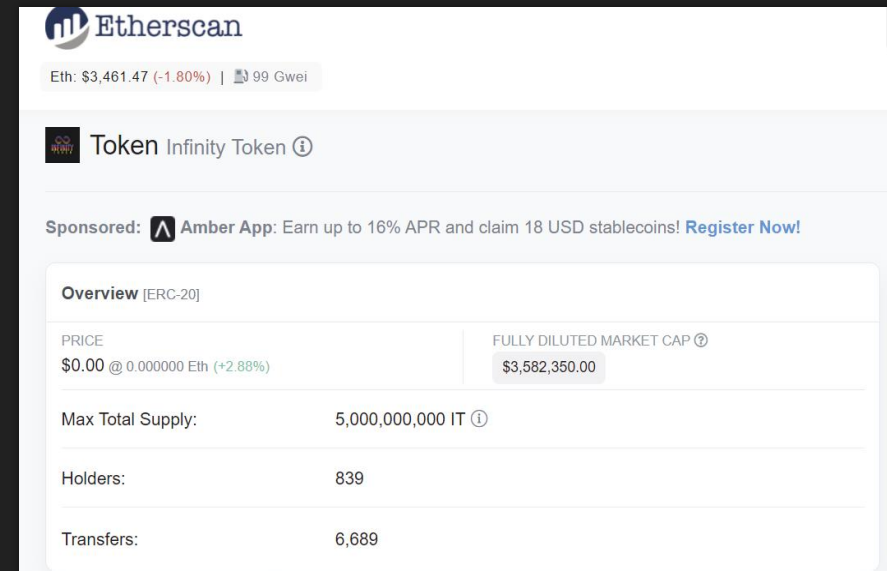

Partnership peak price of  
\$0.00119, Sept 04, 2021

$$5,000,000,000 \times \$0.00119 = \$5,950,000$$

Price of \$0.000715,  
Sept 09, 2021

$$5,000,000,000 \times \$0.00119 = \$3,575,000$$

Take the total amount of tokens available and multiply by the token price.

The screenshot shows the Etherscan interface for the Infinity Token. At the top, it displays the Etherscan logo and the current price of ETH as \$3,461.47 with a -1.80% change, and the gas price as 99 Gwei. Below this, the token name 'Token Infinity Token' is shown with an information icon. A sponsored banner for 'Amber App' is visible, offering a 16% APR and a claim of 18 USD stablecoins. The main section is titled 'Overview [ERC-20]' and contains a table with the following data:

PRICE	FULLY DILUTED MARKET CAP @
\$0.00 @ 0.000000 Eth (+2.88%)	\$3,582,350.00
Max Total Supply:	5,000,000,000 IT ⓘ
Holders:	839
Transfers:	6,689

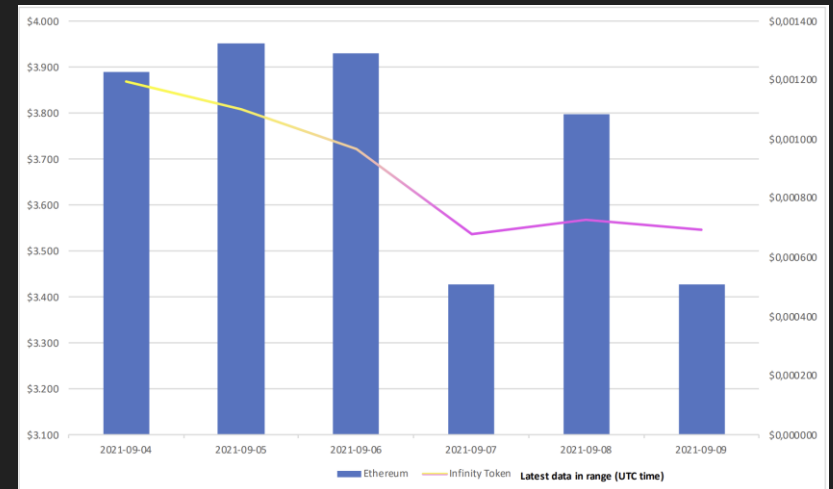

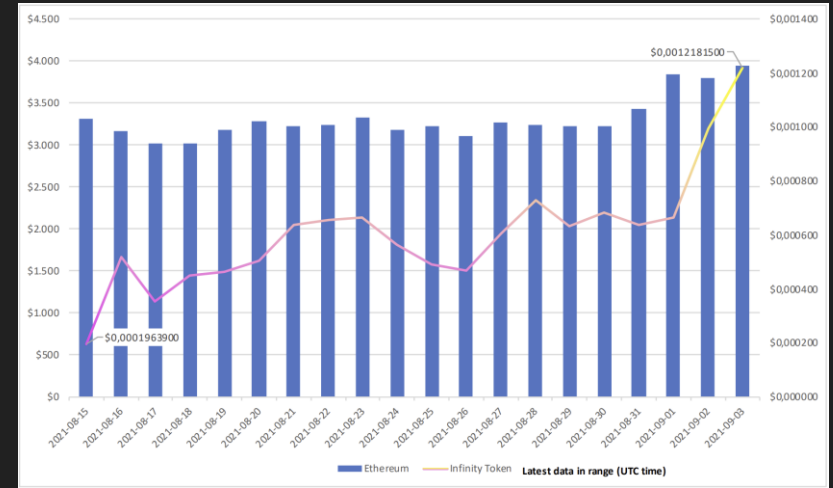

# \$IT & \$ETH Correlation

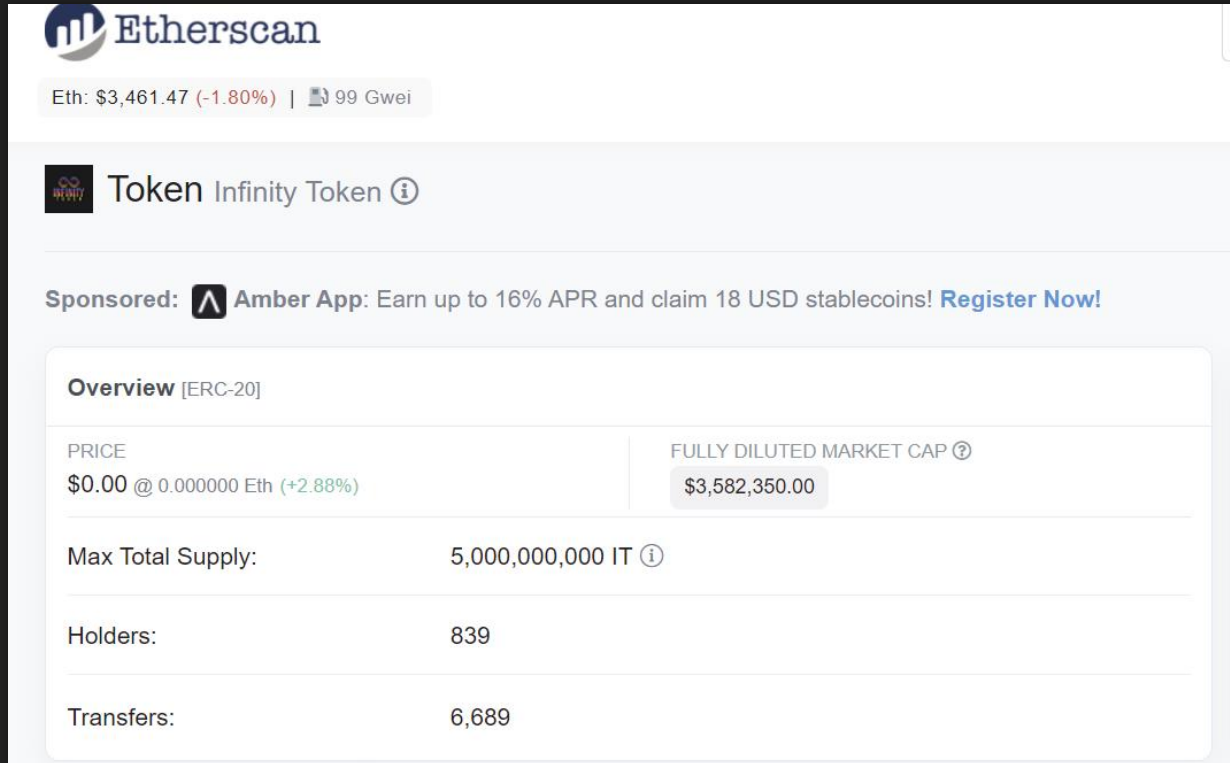

\$ETH increased by 30% in the same time frame as \$IT increased by 621%, 15th Aug – 3rd Sep respectively.

With a market correction from 4th Sep – 9th Sep, ETH dropped by 11% and IT dropped 44.5%.

This shows a direct relationship between \$IT & \$ETH price charts over the course of 25 days.

# Holders

The screenshot shows the Etherscan interface for the Token Infinity Token. At the top, it displays the Etherscan logo and the current price of ETH as \$3,461.47 with a -1.80% change, and 99 Gwei. Below this, the token name 'Token Infinity Token' is shown with its logo and an information icon. A sponsored banner for 'Amber App' is visible. The main section is titled 'Overview [ERC-20]' and contains a table with the following data:

PRICE	FULLY DILUTED MARKET CAP
\$0.00 @ 0.000000 Eth (+2.88%)	\$3,582,350.00
Max Total Supply:	5,000,000,000 IT
Holders:	839
Transfers:	6,689

Current holders : 839

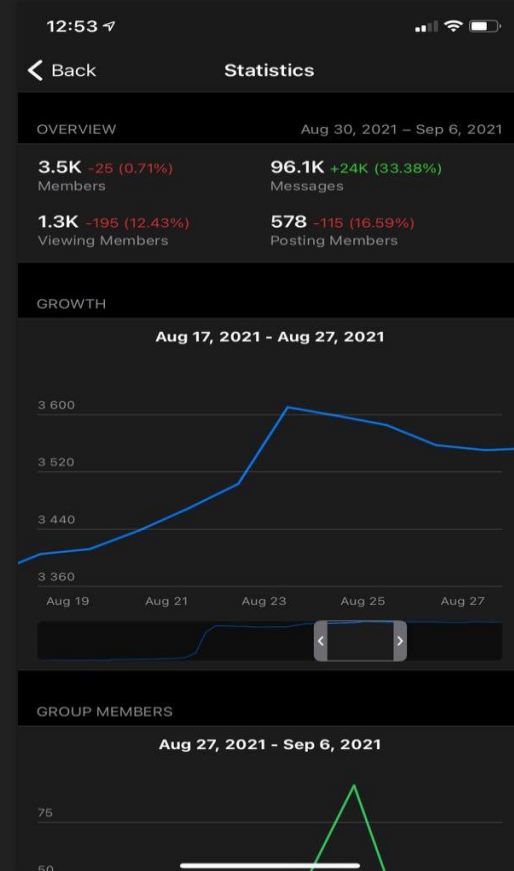

Holders before MXS partnership: 500 (ish)

Increase of 339 which is a 67.8% increase respectively.

# Telegram statistics

Increase of members joining naturally by 255, 1 day after MXS partnership announcement

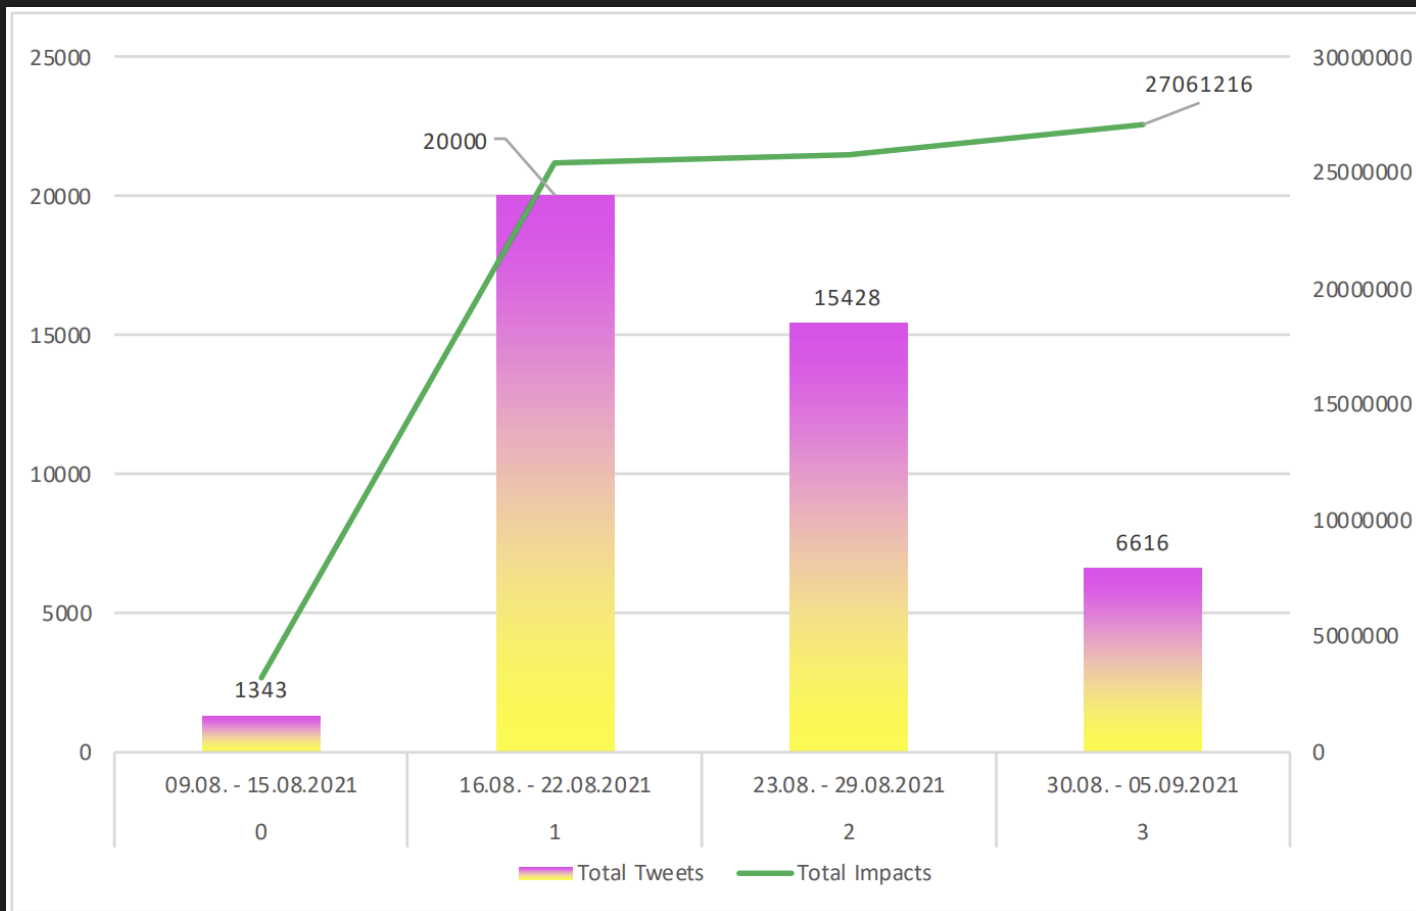

Over 3600 TG users at peak.

255 new members in IT telegram channel

The increase of members held overall.

# Twitter Statistics

As the partnership was announced the increase of tweets jumped by 14.89X, from 1343 (09.08.2021 - 15.08.2021) to 20000 (16.08.2021 - 22.08.2021) respectively.

The majority of tweets were written, promoted and shared by our in house shilling team.

This gives the tweets the launchpad needed to constantly circulate and be viewed more frequently as shown in the graph by the total impacts growing over the course of 21 days.

# Transaction volume

Volume of Transactions

An initial surge from 53 transactions on 15th Aug to 341 transactions on 17th Aug respectively.

This is a difference of 6.4x to the upside.

Factoring the market correction on 4th Sep to 9th Sep, Transactions picked up instantly on the 10th Sep to 14th Sep.

Transactions increase from 16 on the 8th Sep compared to the 14th Sep with a total of 50 is a 3.1X to the plus side.

# Partnership conclusion stats

Volume & Price of \$IT 3 days after partnership has ended.

Volume has increased from \$24,094 to \$62,902. This shows natural growth and an increased interest in \$IT after a market slump.

Price of \$IT has also increased from \$0,000692 to \$0,000851 per token. In the same time frame \$ETH has increased from \$3300 to \$3600. This shows a correlation between \$IT and \$ETH as well as natural and sustained growth.
